<p>sustainable development. We therefore strive to create an exceptional working environment so that even as we win over the trust of customers, employees, suppliers, shareholders and competitors, we are also fulfilling our social responsibility. We are constantly promoting and implementing concepts of environmental protection. We support and sponsor organizations in society, such as: Straits Economic & Cultural Interchange Association, Rotary Club of Taichung, and colleagues from the Taiwan head office have sponsored the book-sharing box in the Taiwan Reading and Culture Foundation's philanthropic library. In addition, our employees have long supported Tung Tzu Association of Taichung City Industrial Park, and cumulative donations have reached NT\$141 thousands. Our honorary chairman established the Hope Media Foundation and actively engages in charity donations and events, allocating approximately NT\$9,133 thousands for charity events throughout the year: The children's theater promoted the spirit of mutual assistance through elementary school tours and public performances; the Center for Media and Social Impact at National Central University project provided college students with relevant resources to learn and engage in social welfare projects; the Taiwan Volunteer Award promoted the spirit of courage, assist events relating to the promotion of social welfare by publishing on mass media, online media platform, and advertising on social media, emergency relief, and social welfare projects to alleviate the difficulties of personal and family life, etc. Out of respect for human rights, all our employees are treated equally regardless of gender, religion, political affiliation, and employment opportunity. We strive to create a good working environment free from all forms of discrimination and harassment. All safety and health aspects are monitored and comply with government regulations.</p>				

Explanation 1: Work environment and personal protection measures: The Company recognizes the importance of protective measures for the workplace and for individual employees. Our key targets and implementation are as follows:

Item No.	Target/Goal	Project	Current situation	Implementation
1.	Zero-accident elevator	Cargo elevators are for cargo only. Overloading is strictly prohibited. They must be maintained and serviced by qualified vendors on a regular basis.	Contracts have been signed with professional vendors for the regular maintenance and service of elevators. Elevators must pass the annual inspection to remain in service.	The heads of relevant units are informed on the spot about the prohibition against passengers in the cargo elevator and overloading. Elevator safety and care rules are posted. All equipment used by the Company is rated the highest class among all enterprises in terms of safety and standardization.
2	Zero electrical hazards	Every electrical equipment should comply with Article 9 of the Regulations for Electrical Technician and Power Facility Inspection and Maintenance Management. Implementation is in compliance with national regulations for safe electricity usage. All electrical equipment comes with a residual current circuit breaker and earth-fault protection.	Contracts have been signed with qualified vendors to conduct electrical safety inspections of all factory circuits, power-off tests, and maintenance take place each year at least once, as required by regulations.	Power circuits suspected of being overloaded are immediately reviewed for improvement. All circuit boxes are labeled with the warning "Do not open if you are not a professional circuit operator" in order to prevent electric shock hazards.
3	Zero fire hazard	Fire prevention equipment is inspected and repaired within a specific time frame according to applicable requirements each year.	In accordance with Article 15 of the Enforcement Rules of Fire Services Act, at least one 4-hour firefighting, emergency notification, and evacuation training drill takes place	Any safety concern in fire safety equipment is to be addressed in a timely manner. If it is abnormal and is determined through inspection to have been damaged, it will be taken care of and

Item No.	Target/Goal	Project	Current situation	Implementation
			<p>at least once every 6 months, and the local firefighting agency is notified in advance.</p> <p>The fire prevention and maintenance unit services, maintains, and replaces damaged facilities on a regular basis. The Industrial Safety Group performs safety audits on a daily basis to make sure that the firefighting access, fire hydrants, and other safety equipment are normal.</p>	<p>replaced immediately, and it will also be numbered for management.</p>
4	<p>Domestic water supply switched over to pure tap water</p>	<p>The pipelines have been modified so that all water requirements can be met directly by tap water. Follow national policies.</p>	<p>The Administration Division issued a warning that the on-site water supply is groundwater that may have been contaminated by heavy metals or other toxins; drinking it directly is strictly prohibited and it should be used carefully.</p>	<p>The entire plant has now switched over to tap water. Drinking water now has filtration equipment installed, and the equipment is serviced periodically.</p>
5	<p>Electronic access control</p>	<p>Apply electronic access control to prevent against unauthorized access. Follow applicable access-control requirements of the Company.</p>	<p>New employees are all given standard privileges. Applications for special access privileges require approval from the highest-ranking supervisor with the relevant approval-granting rights.</p> <p>External people visiting for business must obtain a pass. Visitors must follow instructions and park their vehicles in designated areas. Related</p>	<p>Access control records are maintained. Once an employee is no longer with the Company, access is immediately revoked.</p>

Item No.	Target/Goal	Project	Current situation	Implementation
			release receipts for goods leaving the site will be inspected and verified.	
6	After-hours security	Each day, the last employee to leave the site must set the security alarm to keep the Company safe. After working hours, staff may only access the site under special circumstances, and only after having explained their purpose to the security guard in order to ensure personnel and property safety.	Staff to work overtime on holidays and on the weekends have to follow the overtime staff list issued by the Department of Human Resources. Employees working overtime on holidays and on the weekends must first register with the General Administration Section and collect the security token. The security token must be returned on the next working day to ensure effective management.	If the alarm is triggered for an unknown reason, the security guard on site or the security company shall find the reason and report the incidence.
7	Air-conditioning maintenance management	The chillers, fans and cooling towers undergo planned maintenance.	Chillers are regularly inspected during operation. Any problems are scheduled for correction.	The cooling towers are regularly cleaned and chlorine tabs added to prevent against bacteria and germs and to protect against generation of high pressure on the chillers to reduce expenditure on electricity.
8	Zero-accident for power centrifuge	Design the automatic inspection checklist and ask operators to perform periodic inspections, as required.	Article 74 of the Occupational Safety and Health Facilities Regulations stipulates that the power centrifuge must come to a complete stop before any object is removed from the machine.	Items are truthfully inspected and verified, and heads of executive units are asked to provide precise guidance.
9	Zero-accident for fire-related	The head of the operating unit shall inform the safety control unit (the General	The safety control unit needs to inspect and make sure that there is no safety concern and shall inform	All danger sources are to be removed from the fire operation area, and areas with falling sparks are monitored at all

Item No.	Target/Goal	Project	Current situation	Implementation
	operations	Administration Section or Safety Section) if operations likely to generate sparks are to be performed. The operating unit shall follow the Fire Operating Guide.	operators of details to pay attention to before fire operations begin, despite the fact that a fire operation has been applied for and approved.	times. Fire extinguishers shall be available at the workplace and readily accessible. Based on the class shown on the fire operation certificate, safety measures at the operation site and time-effectiveness of the operating certificate are checked from time to time.
10	Contractor safety and health declaration	Contractors need to carefully read through the document before signing it and ask questions in advance if there is any area that is unclear to them. Reach an agreement regarding construction safety and health requirements, and confirm pre-construction protection and post-construction cleanup upon signing of a contract.	Contractors shall abide by requirements for safety management and provide operators with necessary protective equipment and devices during construction. The construction management department, safety management department, and 6S management department shall confirm on-site that protection requirements are fulfilled to warrant construction before it begins, inspect the process, and accept work upon completion.	The contractor may be ordered to stop work immediately in the event of a serious breach of safety and health regulations. Actions that may be taken for other non-conformities include mandated improvements by a given deadline and termination of contract.
11	Zero-accident cutting machines	Purchase of new automatic band saw	Automatic starts and stops are possible while cutting an object in order to ensure the safety of the operator.	The head of the user unit is required to restrict operation to designated personnel.
12	Labor safety protection	Embark on a series of safety knowledge trainings, set up a safety supervision scheme, and improve safety at the workshop. Establish a 3-tier	All employees are to complete physical checkups for occupational diseases and health. A complete database of all employees' health records is thereby established.	Apart from training on safety awareness, workplace safety and comfort is ensured through the workshop layout, improved ventilation, and better natural/artificial lighting. We will abide by the regulations

Item No.	Target/Goal	Project	Current situation	Implementation
		safety education system and a supervisor safety and production accountability system.	All 3-tier safety training files are archived. Standards for carriage of labor supplies are specified. Occupational safety and health examinations take place on a yearly basis. Provide on-site health consultation services for medical professionals, establish employee health management classification, and prevent occupational accidents and occupational diseases.	concerning the frequency of on-site health care service, and handle relevant labor health protection matters such as health management consultation and health promotion. We will timely adjust the duties and tasks of employees according to their physical conditions, which not only helps prevent occupational accidents and occupational diseases, but also improves employees' physical and mental health, and their working abilities.
13	Pollution control (water, air, noise)	Perform pollution control according to the requirements and standards of the environmental protection department. Invest in waste water treatment systems, applicable clean energy, equipment for desulfurization and dust removal for waste gas prior to emission, and sound-proof equipment.	The Company is continuing to make improvements on water, air and noise pollution.	Emission indicators are monitored online and linked to the network of the environmental protection department. Environmental factors are inspected on a yearly basis to ensure constant improvements. Wastewater is recycled and reused.
14	Recycling and reuse	Improve the product yield, reduce waste generation, and strengthen 6S competitions and recycling of waste for reuse to concretize resource waste reduction, recycling, and reutilization.	The product yield is discussed on a monthly basis. Recycling and reutilization of waste is managed. Utilization of residual heat is continued. Reclaimed water is used for resource saving, and the outstanding 6S units are recognized.	The Company adheres strictly to environmental regulations during waste treatment for harm elimination, volume reduction and recycling. This effectively prevents any impact on the surrounding environment.

Item No.	Target/Goal	Project	Current situation	Implementation
15	Energy conservation	To identify potential problems in energy use, we commissioned an external environmental technology company to audit our energy consumption. The Company also proposed and implemented clean production review.	A comprehensive management organization has been set up as part of our energy management system. A series of energy-saving and waste reduction schemes have been implemented and assessed.	Lighting, water, and electricity are being transformed. Kiln residual heat is recycled and re-utilized. Energy-saving electrical equipment is adopted. Reclaimed water is used again. The kilns are known for their high energy-saving performance. Energy-saving lamps and water valves are used, and buildings such as dormitories and workshops are repaired. All of these are meant to promote energy conservation and consumption reduction, reduce the concentration of pollutants discharged, and realize effective overall emissions.
16	Management measures to prevent the epidemic	We will abide by the policies and measures of the health affairs competent authority to prevent the spread of the epidemic and to maintain physical and mental health of all employees. The risk assessments and response measures of internal operations are adjusted on a rolling basis.	We will examine our core missions and impacted areas, and evaluate them from the aspects of personnel, business, production and operation. Based on the evaluation results, the protection of employees to reduce the risk of infection, personnel working at the office and methods for business travel will be changed according to the development of the epidemic and the level of risk.	We will establish epidemic prevention and response units to keep track of changes in epidemic, announcements on epidemic prevention, preparation of materials, health management and personnel health monitoring, epidemic reports, and preparation to respond to epidemic. Implement personal and workplace hygiene management and execute employee health monitoring plans. External visitors or manufacturers must measure their body temperature one by one and implement conduct name registration. We shall provide alcohol to ensure disinfection and environmental disinfection procedures.

Item No.	Target/Goal	Project	Current situation	Implementation
				<p>Adjust office attendance or business travel methods, such as having flexible working hours, taking turns to work at the office, working from home, canceling or postponing non-essential business trips or large gatherings/conferences, and providing employees with a mechanism for flexible parental leave.</p> <p>We intend to take full advantage of digital tools, such as video conferences, to maintain trust in customer relationships and promote business, and convey correct information on operation to the general public and enhance competitiveness.</p>
